Location: This facility is located in Amstel Business Park and is approximately 20kms from Schiphol Airport and 6kms from the centre of the city

euNetworks operates premium datacenter facilities throughout Europe - Dublin, Frankfurt and Amsterdam. All of the facilities have been designed to the highest standards of security, cooling and power density to meet the demands of the most rigorous requirements.

Our clients number amongst them Hewlett Packard, a number of large European banks, multi-national Internet technology companies, Government Departments, Carriers and ISPs. All our datacenters whilst carrier neutral, are connected to euNetworks' metro and long-haul all-fiber network. All facilities are purpose built to the highest specifications, reflected in the calibre of the predominantly blue-chip clients.

Each of our facilities is supported with two independent supplies of power, 24 x 7 security and technical support and the generators are N+1 redundant.

Facility

- 6,000m² of co-location space
- Shared or dedicated partitioned areas
- All equipment designed to a minimum N+1 configuration

Power

- Diverse independent power supplies
- N+1 redundant powers paths independently supported
- Critical power maintained by UPS systems
- Power density of up to 2.0kVA per square meter
- Diesel generators with onsite fuel for 48hours with 4 hours maximum delivery contract

Security

- Digital Access via proximity cards with full audit system
- Digital video cameras monitor and record all areas
- 24 x 7 monitoring from central security office

Connectivity

- Secure, fully redundant Telco Room with diverse ducts into facility
- Main Distribution Frames (MDFs) in Telco Room
- Intermediate Distribution Frames (IDFs) in co-location rooms
- Multiple Network Providers
- Access to euNetworks Pan European Fiber Network

Environment

- Temperature of 22 ° C ± 2.0°C in co-location room
- Raised Floor (600mm) for spot cooling
- VESDA fire detection and suppression with pre-action mist system

Maintenance

- Full PPM (Planned, Preventative Maintenance) and Change Management processes
- Specialist equipment supported and maintained by supplier
- Full maintenance records

Support

- Advanced Building Management Systems
- Monthly Client Reporting System
